

Resisto 1200 HE IP66 2800lm 840 EM  
0010234

Produkteigenschaften

• Resisto, integrierte wetterfeste LED-Leuchte mit UV-stabilisiertem Flachdiffusor, der für ein gleichmäßiges Lichtbild, optimale Systemeffizienz und reduzierte Blendung sorgt. Diffusorklemmen und Befestigungsbügel aus Edelstahl 301 für die Aufbaumontage. Gehäuse und Diffusor aus Polycarbonat - keine Gelbverfärbung mit der Zeit. 2800 lm; 22 W; 127 lm/W; 4.000 K; SDCM<3; nicht dimmbar; CRI80; IP66; IK08; Klasse I; 69.000 Stunden (L80B20) Lebensdauer; 1.200 mm x 89 mm x 88 mm; D-Zeichen; 3-Stunden-Notstrombatterien.

| Product design      | 63.0          | 134.0                   | 1.9        | 0.0 to 0.5               | Very poor circular economy performance       |
| Manufacturing       | 19.2          | 46.5                    | 1.7        | 0.5 to 1.5               | Some circular economy functionality          |
| Materials           | 5.0           | 24.0                    | 0.8        | 1.5 to 2.5               | Definite/substantial progress to circularity |
| Ecosystem           | 17.0          | 43.0                    | 1.6        | 2.5 to 4.0               | Excellent circularity                        |
| Overall performance | 104.2         | 247.5                   | 1.50       |                          |                                              |

Technical Memorandum (TM) 66 describes a Circular Economy’s main aims, how it can be achieved and what it’s practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)’s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections :

- Product Design :  
Manufacturing :  
Materials :  
Ecosystem :
- Covering topics such as design for long life and repair  
Additive and subtractive techniques and localisation  
Usage of recyclable materials rather than virgin  
Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product’s performance in the context of a Circular Economy
