## COLOSSAL 600mm 940 PRISM DIR+HAL WHITE

2071227

### Produkteigenschaften

• Runde, architektonische Leuchte mit einem Durchmesser von 600 mm, für Anbau- oder Pendelmontage geeignet. Pulverbeschichtetes Aluminiumgehäuse (RAL9016) mit prismatischer PMMA-Abdeckung. Direkte/indirekte (Halo) Lichtverteilung, 3485 lm Lichtstrom, 31,3 W Systemleistung, 111 lm/W Systemeffizienz. Konstantstrom-Treiber. Farbwiedergabeindex Ra >90, 4.000 K neutralweiße LED, Farbwerttoleranz der MacAdam-Ellipse in 3 Stufen. IP40, IK03. 350 mA Antriebsstrom. UGR≤19. Elektrische Schutzklasse 1, 220-240 V. Gemeldete Lebensdauer 66.000 Stund...

| Result              |               |                         |            |
|---------------------|---------------|-------------------------|------------|
| Category            | Points Scored | Maximum possible points | Assessment |
| Product design      | 65            | 134.0                   | 2.3        |
| Manufacturing       | 21.5          | 46.5                    | 1.9        |
| Materials           | 5             | 24.0                    | 0.8        |
| Ecosystem           | 18            | 43.0                    | 1.7        |
| Overall performance | 109.5         | 247.5                   | 1.68       |

| How to analyse the score |                                              |
|--------------------------|----------------------------------------------|
| 0.0 to 0.5               | Very poor circular economy performance       |
| 0.5 to 1.5               | Some circular economy functionality          |
| 1.5 to 2.5               | Definite/substantial progress to circularity |
| 2.5 to 4.0               | Excellent circularity                        |

Technical Memorandum (TM) 66 describes a Circular Economy's main aims, how it can be achieved and what its practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)'s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections :

- Product Design : Covering topics such as design for long life and repair
- Manufacturing : Additive and subtractive techniques and localisation
- Materials : Usage of recyclable materials rather than virgin
- Ecosystem : Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product's performance in the context of a Circular Economy

CIBSE (2021) Circular Economy Assessment Method - Make TM66 Digital Tool beta version 22nd October 2021 (London : Chartered Institution of Building Services Engineers)
