Result			
Category	Points Scored	Maximum possible points	Assessment
Product design	86	134.0	2.6
Manufacturing	18.1	46.5	1.6
Materials	4	24.0	0.7
Ecosystem	18	43.0	1.7
Overall performance	126.1	247.5	1.66

How to analyse the score			
Very poor circular economy performance			
Some circular economy functionality			
Definite/substantial progress to circularity			
Excellent circularity			

Technical Memorandum (TM) 66 describes a Circular Economy's main aims, how it can be achieved and what it's practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)'s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections:

Product Design: Covering topics such as design for long life and repair

Manufacturing: Additive and subtractive techniques and localisation

Materials: Usage of recyclable materials rather than virgin

Ecosystem : Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product's performance in the context of a Circular Economy
