

SylWork Flood BP 5000LM 840 IP65
0090001

Features

- Slim LED portable work light • Lightweight, slim, stylish robust, • High-quality plastic body • Stable, flexible positioning with stand or Tripod • Option to use 2 work lights in the same time installed on the same Tripod • Battery Operation - Battery running time & Lumen output: 90 minutes @ 1200lm, 5 hours @300lm, battery charging time: 4 hours • Space-saving design – Tripod version can be folded up and stowed away • 4000K Cool White light • Total system efficacy up to 111lm/W • CRI >80 • Operating temperature range: -20 to +40°C ...

CIBSE TM66

Result					
Category	Points Scored	Maximum possible points	Assessment	How to analyse the score	
Product design	24	134.0	0.7	0.0 to 0.5	Very poor circular economy performance
Manufacturing	17.1	46.5	1.5	0.5 to 1.5	Some circular economy functionality
Materials	3	24.0	0.5	1.5 to 2.5	Definite/substantial progress to circularity
Ecosystem	13	43.0	1.2	2.5 to 4.0	Excellent circularity
Overall performance	57.1	247.5	0.98		

Technical Memorandum (TM) 66 describes a Circular Economy’s main aims, how it can be achieved and what it’s practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)’s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections :

- Product Design : Covering topics such as design for long life and repair
- Manufacturing : Additive and subtractive techniques and localisation
- Materials : Usage of recyclable materials rather than virgin
- Ecosystem : Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product’s performance in the context of a Circular Economy
