

Caractéristiques de la gamme

• OPTIX S 1200 2L 29W 4100lm 840 D/I ALU DALI - luminaire suspendu à haute efficacité et à faible éblouissement pour les applications tertiaires. Distribution directe/indirecte (70/30%) pour un confort accru. Optique à très faible luminance en polycarbonate finition aluminisée dans une configuration à 2 lignes. Luminaire recouvrable de laine de verre ou isolant acoustique. Driver DALI certifié ENEC dimmable jusque 1%. Très faible scintillement <5%. Température de couleur (CCT) 4000K, IRC>80, consistance des couleurs SDCM<3. Flux lumine...

| Ecosystem           | 21            | 43.0                    | 2          | 2.5 to 4.0               | Excellent circularity                        |
| Overall performance | 127.4         | 247.5                   | 1.88       |                          |                                              |

Technical Memorandum (TM) 66 describes a Circular Economy’s main aims, how it can be achieved and what it’s practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)’s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections :

- Product Design :  
Manufacturing :  
Materials :  
Ecosystem :
- Covering topics such as design for long life and repair  
Additive and subtractive techniques and localisation  
Usage of recyclable materials rather than virgin  
Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product’s performance in the context of a Circular Economy
