

## Resisto 1200 IP66 35W 5050lm 840 CT 0010217

### Caractéristiques de la gamme

• Resisto 1200 IP66 35W 5050lm 840 CT - Solution étanche Led en polycarbonate. Étriers coulissants en inox 301 et platine LED fixée à la vasque. Pré-perçage aux extrémités pour 1 ou 2 presse-étoupes et pré-perçage pour alimentation par le milieu. Température de couleur 4000K, IRC80. Flux lumineux sortant 5050lm. Puissance consommée 35W. Efficacité lumineuse : 137lm/W. Version câblage traversant (CT). Facteur de puissance : 0,95. Taux de distorsion harmonique : 20%. Durée de vie (L80) : 69.000h. Risque photobiologique RG1, IP66, IK08. T...

Technical Memorandum (TM) 66 describes a Circular Economy's main aims, how it can be achieved and what its practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assessment Method for Manufacturing (CEAM-Make)'s list of 66 searching questions, the majority of which ask for back-up evidence, is split into four sections :

- Product Design : Covering topics such as design for long life and repair
- Manufacturing : Additive and subtractive techniques and localisation
- Materials : Usage of recyclable materials rather than virgin
- Ecosystem : Repair or upgrade services to complement circular economy design

The outcome of the assessment is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product's performance in the context of a Circular Economy
