

OptiClip 600 2L 33W 2100-4450lm 830 Blanc MP  
0034000

Caractéristiques de la gamme

• Luminaire architectural à modules LED interchangeable. Solution éco-responsable avec modules LED et driver remplaçables. Version MultiPuissance à 8 positions réglables à l'installation. Flux lumineux max 4450lm. Puissance max 33W. Efficacité jusqu'à 141lm/W. Température de couleur 3000K. IRC>80. Faible éblouissement UGR<16. Luminance <1000Cd/m² à 65°, conforme aux exigences de la norme EN 12464-1 sur l'éclairage des postes de travail avec écran. Dimensions : 595x595x34mm. Finition blanche (RAL9016). IP40. IK07. Classe II. Certificati...

| Overall performance | 130.1         | 247.5                   | 1.98       |                          |                                              |

Technical Memorandum (TM) 66 describes a Circular Economy's main aims, how it can be achieved and what it's practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)'s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections :

- Product Design :  
Manufacturing :  
Materials :  
Ecosystem :
- Covering topics such as design for long life and repair  
Additive and subtractive techniques and localisation  
Usage of recyclable materials rather than virgin  
Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product's performance in the context of a Circular Economy
