

Caractéristiques de la gamme

• Luminaire architectural à modules LED interchangeable. Solution éco-responsable unique avec corps en carton certifié durable (60% recyclé, 100% recyclable) résistant au feu (test au fil incandescent à 650°C) et à l'humidité (jusqu'à 60%). Maintenance facilitée grâce aux modules LED et driver remplaçables. Flux lumineux 3100lm. Puissance 26W. Efficacité 119lm/W. Température de couleur 3000K. IRC>80. Faible éblouissement UGR<19. IP40. IK02. Classe II. Driver certifié ENEC équipé d'un bornier de repiquage LiLo. Durée de vie 62 500h (L80...

CIBSE TM66

Result					
Category	Points Scored	Maximum possible points	Assessment	How to analyse the score	
Product design	91	134.0	2.7	0.0 to 0.5	Very poor circular economy performance
Manufacturing	25.5	46.5	2.2	0.5 to 1.5	Some circular economy functionality
Materials	14	24.0	2.3	1.5 to 2.5	Definite/substantial progress to circularity
Ecosystem	34	43.0	3.2	2.5 to 4.0	Excellent circularity
Overall performance	164.5	247.5	2.60		

Technical Memorandum (TM) 66 describes a Circular Economy’s main aims, how it can be achieved and what it’s practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)’s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections :

- Product Design :
- Covering topics such as design for long life and repair
- Manufacturing :
- Additive and subtractive techniques and localisation
- Materials :
- Usage of recyclable materials rather than virgin
- Ecosystem :
- Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product’s performance in the context of a Circular Economy
