

SYLBATTEN IP20 L1500 TWIN 4000K **0045164**

Caractéristiques de la gamme

• full range of LED Battens to replace traditional T8 battens (600mm, 1200mm, 1500mm and 1800mm), ease of installation, 4000K, 25000h lifethtime

CIBSE TM66

Result			
Category	Points Scored	Maximum possible points	Assessment
Product design	58	134.0	1.7
Manufacturing	17.1	46.5	1.5
Materials	6	24.0	1
Ecosystem	15	43.0	1.4
Overall performance	96.1	247.5	1.40

Very poor circular economy performance
Some circular economy functionality
Definite/substantial progress to circularity
Excellent circularity

Technical Memorandum (TM) 66 describes a Circular Economy's main aims, how it can be achieved and what it's practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)'s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections:

Product Design: Covering topics such as design for long life and repair

Manufacturing: Additive and subtractive techniques and localisation

Materials: Usage of recyclable materials rather than virgin

Ecosystem : Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product's performance in the context of a Circular Economy

CIBSE (2021) Circular Economy Assessment Method - Make TM66 Digital Tool beta version 22nd October 2021 (London: Chartered Institution of Building Services Engineers)
