

Kalani G2 IP66 150W 21600lm 830 Asym DALI  
0056811

Caractéristiques de la gamme

• Projecteur Led extérieur. Optique asymétrique (65°x120° à 55°). Caisson en aluminium RAL 9017. Température de couleur 3000K. IRC>80, consistance des couleurs SDCM<3. Flux lumineux sortant 21600lm. Puissance consommée 150W. Efficacité lumineuse 144lm/W. Gestion DALI. Facteur de puissance 0,95. Durée de vie (L80) : 91 000h. Groupe de risque photobiologique GR1. IP66. IK08. Classe I. Test au fil incandescent 650°C. Température de fonctionnement de -30°C à +50°C. Protection contre les surtensions : mode différentiel jusqu'à 10kV, mode com...

| Product design      | 86            | 134.0                   | 2.6        | 0.0 to 0.5               | Very poor circular economy performance       |
| Manufacturing       | 18.1          | 46.5                    | 1.6        | 0.5 to 1.5               | Some circular economy functionality          |
| Materials           | 4             | 24.0                    | 0.7        | 1.5 to 2.5               | Definite/substantial progress to circularity |
| Ecosystem           | 18            | 43.0                    | 1.7        | 2.5 to 4.0               | Excellent circularity                        |
| Overall performance | 126.1         | 247.5                   | 1.66       |                          |                                              |

Technical Memorandum (TM) 66 describes a Circular Economy’s main aims, how it can be achieved and what it’s practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)’s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections :

- Product Design : Covering topics such as design for long life and repair
- Manufacturing : Additive and subtractive techniques and localisation
- Materials : Usage of recyclable materials rather than virgin
- Ecosystem : Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product’s performance in the context of a Circular Economy
