

Caractéristiques de la gamme

• SylPipe 1200 15W 1800lm 830. Gamme de réglottes LED haut flux (1500lm/m environ), idéales pour le remplacement des réglottes fluo T5. Disponible en longueur 300/600/900/1200/1500mm. Haute efficacité lumineuse jusqu'à 125lm/W. Température de couleur 3000K ou 4000K. Driver intégré, branchement direct 220-240V AC. Corps en polycarbonate robuste. Installation facile grâce aux étriers inclus. Mise en ligne possible jusqu'à 10m (liaisons invisibles). Durée de vie 30 000 heures. Garantie 3 ans.

CIBSE TM66

Result					
Category	Points Scored	Maximum possible points	Assessment	How to analyse the score	
Product design	25	134.0	0.7	0.0 to 0.5	Very poor circular economy performance
Manufacturing	17.1	46.5	1.5	0.5 to 1.5	Some circular economy functionality
Materials	3	24.0	0.5	1.5 to 2.5	Definite/substantial progress to circularity
Ecosystem	13	43.0	1.2	2.5 to 4.0	Excellent circularity
Overall performance	58.1	247.5	0.98		

Technical Memorandum (TM) 66 describes a Circular Economy’s main aims, how it can be achieved and what it’s practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)’s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections :

- Product Design :
- Covering topics such as design for long life and repair
- Manufacturing :
- Additive and subtractive techniques and localisation
- Materials :
- Usage of recyclable materials rather than virgin
- Ecosystem :
- Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product’s performance in the context of a Circular Economy
