

### Caractéristiques de la gamme

- OPTIX S 1200 2L 30W 4100lm 840 D/I ALU SSC - luminaire suspendu à haute efficacité et à faible éblouissement pour les applications tertiaires. Distribution directe/indirecte (70/30%) pour un confort accru. Optique à très faible luminance en polycarbonate finition aluminisée dans une configuration à 2 lignes. Luminaire recouvrable de laine de verre ou isolant acoustique. Gestion en réseau sans asservissement par système connecté intelligent SylSmart Standalone (Bluetooth Mesh), entièrement paramétrable Plug&Play par smartphone/tablet...

| Category            | Points Scored | Maximum possible points | Assessment | How to analyse the score |                                              |
| Product design      | 76            | 134.0                   | 2.3        | 0.0 to 0.5               | Very poor circular economy performance       |
| Manufacturing       | 23.4          | 46.5                    | 2          | 0.5 to 1.5               | Some circular economy functionality          |
| Materials           | 7             | 24.0                    | 1.2        | 1.5 to 2.5               | Definite/substantial progress to circularity |
| Ecosystem           | 21            | 43.0                    | 2          | 2.5 to 4.0               | Excellent circularity                        |
| Overall performance | 127.4         | 247.5                   | 1.88       |                          |                                              |

Technical Memorandum (TM) 66 describes a Circular Economy’s main aims, how it can be achieved and what it’s practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)’s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections :

- Product Design : Covering topics such as design for long life and repair
- Manufacturing : Additive and subtractive techniques and localisation
- Materials : Usage of recyclable materials rather than virgin
- Ecosystem : Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product’s performance in the context of a Circular Economy

CIBSE (2021) Circular Economy Assessment Method - Make TM66 Digital Tool beta version 22nd October 2021 (London : Chartered Institution of Building Services Engineers)
