

### Caractéristiques de la gamme

• OPTIX E 600 2L 27W 3400lm 840 ALU SSA - luminaire encastré à haute efficacité et à faible éblouissement pour les applications tertiaires. Optique à très faible luminance avec finition aluminisée. Configuration à 2 lignes. Luminaire recouvrable de laine de verre ou isolant acoustique. Equipé de la technologie de gestion intelligente SylSmart Connected Building pour un éclairage économique. Intègre détection de présence/absence et de lumière naturelle et module de communication Bluetooth Mesh (sans fil) pour un travail en réseau automa...

| Category            | Points Scored | Maximum possible points | Assessment | How to analyse the score |                                              |
| Product design      | 76            | 134.0                   | 2.3        | 0.0 to 0.5               | Very poor circular economy performance       |
| Manufacturing       | 23.4          | 46.5                    | 2          | 0.5 to 1.5               | Some circular economy functionality          |
| Materials           | 7             | 24.0                    | 1.2        | 1.5 to 2.5               | Definite/substantial progress to circularity |
| Ecosystem           | 21            | 43.0                    | 2          | 2.5 to 4.0               | Excellent circularity                        |
| Overall performance | 127.4         | 247.5                   | 1.88       |                          |                                              |

Technical Memorandum (TM) 66 describes a Circular Economy’s main aims, how it can be achieved and what it’s practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)’s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections :

- Product Design :  
Manufacturing :  
Materials :  
Ecosystem :
- Covering topics such as design for long life and repair  
Additive and subtractive techniques and localisation  
Usage of recyclable materials rather than virgin  
Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product’s performance in the context of a Circular Economy
