

### Caractéristiques de la gamme

• Downlight LED rond alliant haut confort visuel et performances élevées. Réflecteur polycarbonate et dissipateur de chaleur aluminium. Réflecteur argent et collerette blanche. Température de couleur (CCT) 3000K, IRC>90. Consistance des couleurs SDCM<3. Flux lumineux sortant 5900lm. Puissance consommée 46W. Efficacité lumineuse 128lm/W. Durée de vie : 46.000 heures (L90). Risque photobiologique Conforme NF EN IEC 60598-1 (GR0/GR1). IP40/20, IK02. Classe II. Test au fil incandescent 850°C. Gestion d'éclairage DALI (compatible bouton-pous...

| Category            | Points Scored | Maximum possible points | Assessment | How to analyse the score                                |
| Product design      | 75            | 134.0                   | 2.2        | 0.0 to 0.5 Very poor circular economy performance       |
| Manufacturing       | 18.7          | 46.5                    | 1.6        | 0.5 to 1.5 Some circular economy functionality          |
| Materials           | 4             | 24.0                    | 0.7        | 1.5 to 2.5 Definite/substantial progress to circularity |
| Ecosystem           | 19            | 43.0                    | 1.8        | 2.5 to 4.0 Excellent circularity                        |
| Overall performance | 116.7         | 247.5                   | 1.58       |                                                         |

Technical Memorandum (TM) 66 describes a Circular Economy’s main aims, how it can be achieved and what it’s practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)’s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections :

- Product Design : Covering topics such as design for long life and repair
- Manufacturing : Additive and subtractive techniques and localisation
- Materials : Usage of recyclable materials rather than virgin
- Ecosystem : Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product’s performance in the context of a Circular Economy
