

## Caractéristiques de la gamme

• Downlight LED rond alliant haut confort visuel et performances élevées. Réflecteur polycarbonate et dissipateur de chaleur aluminium. Réflecteur doré et collerette noire. Faible éblouissement UGR<19 jusqu'à 2400lm, avec une large distribution de la lumière et un angle de rayonnement de 70°. Niveau de luminance à 65° inférieur à 300cd/m2 jusqu'à 2400 lm et, inférieur à 1000cd/m2 jusqu'à 6050lm. Température de couleur (CCT) 4000K, IRC>90. Consistance des couleurs SDCM<3. Flux lumineux sortant 1300lm. Puissance consommée 15W. Efficacité ...

| Category            | Points Scored | Maximum possible points | Assessment | How to analyse the score                                |
| Product design      | 75            | 134.0                   | 2.2        | 0.0 to 0.5 Very poor circular economy performance       |
| Manufacturing       | 18.7          | 46.5                    | 1.6        | 0.5 to 1.5 Some circular economy functionality          |
| Materials           | 4             | 24.0                    | 0.7        | 1.5 to 2.5 Definite/substantial progress to circularity |
| Ecosystem           | 19            | 43.0                    | 1.8        | 2.5 to 4.0 Excellent circularity                        |
| Overall performance | 116.7         | 247.5                   | 1.58       |                                                         |

Technical Memorandum (TM) 66 describes a Circular Economy's main aims, how it can be achieved and what its practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assessment Method for Manufacturing (CEAM-Make)'s list of 66 searching questions, the majority of which ask for back-up evidence, is split into four sections :

- Product Design : Covering topics such as design for long life and repair
- Manufacturing : Additive and subtractive techniques and localisation
- Materials : Usage of recyclable materials rather than virgin
- Ecosystem : Repair or upgrade services to complement circular economy design

The outcome of the assessment is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product's performance in the context of a Circular Economy
