Result	esult							
Category	Points Scored	Maximum possible points	Assessment]	How to analyse the score			
Product design	60	134.0	1.8		0.0 to 0.5	Very poor circular economy perform		
Manufacturing	17.1	46.5	1.5		0.5 to 1.5	Some circular economy functionality		
Materials	0	24.0	0		1.5 to 2.5	Definite/substantial progress to circ		
Ecosystem	18	43.0	1.7		2.5 to 4.0	Excellent circularity		
Overall performance	95.1	247.5	1.25					

Technical Memorandum (TM) 66 describes a Circular Economy's main aims, how it can be achieved and what it's practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)'s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections :

Product Design :	Covering topics such as design for long life and repair
Manufacturing :	Additive and subtractive techniques and localisation
Materials :	Usage of recyclable materials rather than virgin
Ecosystem :	Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product's performance in the context of a Circular Economy
